

Usability Testing	
<i>List 3 goals and tasks PRIOR to testing. When testing, verbally ask the participant to perform each task, without giving away the answer. Note what the participant does (and what they struggle with) for each participant.</i>	
Goal (What You Want to Test and Why)	Task (Scenario You'll Verbally Ask the Participant to Do, without giving away answer)
Goal 1	Task 1
Goal 2	Task 2
Goal 3	Task 3
Usability Recommendations	
<i>Actionable changes and fixes you'll make based on the results/findings above (to be filled in after testing). Write in complete sentences.</i>	
Recommendation #1

Recommendation #4	
Technical/Performance/Accessibility Testing	
<i>Test your 3 templates for technical issues in Google's performance test tool: <a href="https://web.dev/">https://web.dev/</a> . Note any fixes identified and implemented. Once implemented, run your tests again to see if the score improves. Your score must improve in at least one area.</i>
